

The county is gathering information on homes affected with any uninsured flooding, sewage backup and any damage that may have occurred during this past Tuesday's storm. People should contact their township clerk or city office to report these issues. The information will then be compiled and forwarded to the state of Minnesota to see if we reach the threshold for an Individual Assistance Declaration. At this time, THERE IS NO individual assistance declaration but Redwood County and the state of Minnesota Department of Homeland Security are trying our best to try to secure one.
