

Application for Extraction Interim Use Permit

Location of the Extraction:

Permit #: 4-22 Date: _____

Address: _____

28596 395th St

City: Renville

State: MN

Zip: 56284

House #

Street Name

Parcel #: 52-005-2020

Township: Delhi

Section: 5

Twp #: 113-N

Range: 36-W

Legal Description:

See attached..

Information about the Extraction:

Zoning District: Agriculture

Soil Type 1: Sandy/Gravelly

Soil Type 2: _____

General description of the extraction: **NOTICE: Change of land use may affect your property taxes.**

Gravel & aggregate materials will be extracted and processed on site to be used for highway construction and private development.

Number of acres to be extracted: Approx: 15

Type of Road: Haul Road Right-of-Way width measured from centerline N/A

Setbacks: (Please enter in feet)

Setback from the Center of the Road: N/A

Side Yard Setback: N/A Direction: _____

Side Yard Setback: N/A Direction: _____

Rear Yard Setback: N/A Direction: _____

Starting Date: April 2022 Date of Completion: April 2032 (maximum 10 years)

Drainage Plan:

All drainage will be directed back into the bottom of the pit where it will infiltrate on-site.

Landscape and screening plans:

Earthen berms were constructed in previous mining operations which will effectively screen operations from neighboring properties.

Water plan (estimated water use):

No water used for washing will be needed on-site.

Statement addressing noise, vibration, glare, heat, smoke, particle matter, odors, exterior lighting, toxic or noxious matter, dust, etc:

Water will be applied to haul route as needed to reduce dust. High quality mufflers and berm screening will reduce noise and visual pollution. No other pollutants will be produced.

Reclamation plan: (Attach Map)

See attached reclamation plan...

Estimated Cost of Reclamation: \$50,000

**Duininck Inc.
Conditional Use Permit Application**

for

Gravel Pit Operations

March 25, 2022

Application for a renewal of a Conditional Use Permit to allow for the mining and processing of gravel, granular materials, as well as all related stockpiling.

Delhi Township
Redwood County, Minnesota

Property Owner: Zimmerli Family Trust
% James Robinson

1. APPLICANT

Duininck Inc.
Attn: Jason Ver Steeg
P.O. Box 208
Prinsburg, MN 56281

2. LANDOWNER

Zimmerli Family Trust
% James Robinson
28596 395th Street
Belview, MN 56214

3. LEGAL DESCRIPTION

A tract of land located in Section 5, Township 113 North, Range 36 West, Redwood County, Minnesota, described as follows:

Commencing at the Northwest corner of said Section 5, thence on an assumed bearing of S88°40'16"E along the north line of said Section 5, a distance of 1160.79 feet; thence on a bearing of S1°36'38"W, a distance of 313.93 feet to the point of beginning; thence continuing on a bearing of S1°36'38"W, a distance of 965.19 feet; thence on a bearing of S88°24'11"E, a distance of 712.47 feet; thence on a bearing of S67°42'24"E, a distance of 819.57 feet; thence on a bearing of N23°12'19"E, a distance of 317.18 feet; thence on a bearing of N13°25'37"E, a distance of 339.48 feet; thence on a bearing of N1°36'38"E, a distance of 283.56 feet; thence on a bearing of N88°23'22"W, a distance of 186.25 feet; thence on a bearing of N88°23'22"W, a distance of 200.10 feet; thence on a bearing of N52°26'48"W, a distance of 1030.93 feet; thence on a bearing of N85°59'12"W, a distance of 213.15 feet; thence on a bearing of S15°44'08"W, a distance of 275.10 feet; thence on a bearing of N89°37'54"W, a distance of 164.42 feet, to the point of beginning; all containing 37.23 acres, more or less.

4. CURRENT LAND USE

Most recently, the land that lies within the proposed boundary has been in cropland and gravel pit. Duininck had previously requested and been granted a CUP in 2010. Since then a large portion of the area within the pit has been mined. Since Duininck's permit expired in 2020 the site has not been used for any sort of other commercial or residential applications. This 37 acre parcel is bordered on the north by the Minnesota River Valley, on the west and south by agricultural land, and on the east by the Zimmerli residence. The topography of the site is fairly flat, as there is less than a 10' foot difference in elevation from the highest

point to the lowest point of the site. The original conditions of the site, before any new mining is done, is shown on plan sheet 1 of 3 entitled *Original Conditions*.

5. PROPOSED USE

A renewal of a Conditional Use Permit is being requested to mine and process gravel and granular materials. The total area of gravel to be mined will be approximately 15 acres, entirely on the west side of the site. The materials taken from the property are planned to continue being used primarily for roadway construction and maintenance, as well as for development in the private sector. By bringing additional sand and gravel into a competitive market, there will continue to be a favorable impact on the cost of developing and maintaining private and public improvements.

6. DUST CONTROL

Dust will be controlled with a water truck as needed along the ½ mile stretch of township road leading to the pit.

7. NOISE CONTROL

There are several measures that will continue to be taken to assure that the noise level that is generated from the crushing and hauling operations will be at an acceptable level. First of all, all equipment is kept in good working order and is equipped with high quality mufflers to eliminate a good portion of the noise before it is even released into the environment. Secondly, earthen dikes will be built adjacent to neighboring property owners. These will be built from the organic material that is stripped off of the pit prior to the commencement of excavation or crushing operations. Finally, the excavation and crushing operations will be staged in such a way that the excavation will actually be cutting into the hills, making the walls of the pit natural sound barriers.

8. EROSION AND STORM WATER CONTROL PLAN

There are several steps that will be taken to control erosion on this site.

1. The excavation plan calls for a flattening of the slopes, which will slow the water down significantly. This will prevent the soil particles from being dislodged from their present location.
2. Great care will be taken not to disturb more land than is necessary for the removal of gravel and granular materials at the time that the excavation is taking place.
3. The land will be restored according to the reclamation plan as soon as excavation of gravel and granular materials is complete.

PROPOSED MINING OPERATION PLAN

1. GENERAL

The material that is excavated from this pit will be used to service the market for gravel and granular materials throughout this area of the state. There is certainly a continually growing need for these materials in the construction industry. This need is fueled by the continued development of residences, industries, and the ever changing highway system. Many of the good quality deposits of gravel and granular materials have either been exhausted or have been built over by development. This pit would provide an excellent source of high quality gravel and granular materials and would definitely have a positive impact on the cost of maintaining and developing public and private improvements.

2. SEQUENCING OF THE MINING AND CRUSHING OPERATION

The first stage of the mining operation will be to strip the overburden off of the site. This overburden has been and will likely continue to be stockpiled along the south end of the pit along the road. This provides a natural noise barrier as well as making the pit more aesthetically pleasing. A screening unit and crusher will then be moved in to the pit to start processing the gravel and granular material. The material on the west side will be excavated and processed. The processed material will be stockpiled in the southeast corner of the pit and then from there the material would be transported to the current project as needed.

After all granular materials have been removed, the site will be graded so that it is in substantial conformance with the contours shown on plan sheet 2 of 3 labeled *Proposed Operations*, in as much as it is possible. The pit will then be restored as set forth in the reclamation plan.

Since the need for the materials present in this pit are generally dependent on the competitive bidding process, there is no practical way to give an accurate estimation of the duration of the mining operation. I can, however, make a couple of generalizations about the mining process. When a crusher is mobilized into a pit, it is generally at that location for 1-4 weeks, depending on the amount of material that is needed for the projects in close proximity to the pit. After the material is crushed and/or screened, the stockpile is generally removed from the pit and brought to the project in which it is needed within a year of when it is crushed.

3. HOURS OF OPERATION

The hours of operation will generally be from 6:00 a.m. until 8:00 p.m. Occasionally, we may operate later than 8:00 p.m. if it is needed to complete daily operations on the current project.

4. RECLAMATION PLAN

The natural habitat of the area that is disturbed will be restored, in as much as it is possible, resulting in returning this gravel pit area to pastureland after completion of mining. This will be done by being careful not to disturb any more land that is necessary for the removal of the aggregates and also by beginning the reclamation process as soon as possible after the material is removed. The reclamation plan includes the following aspects:

- A. The site shall be graded so that it is in substantial conformance with the proposed contours, in as much as it is possible. This will result in a drainage pattern to the northeast.
- B. All slopes greater than 3:1 will be flattened, resulting in a gently rolling topography and substantial conformity to the land immediately surrounding the site, which will minimize erosion due to rainfall.
- C. A minimum of 4" topsoil will be placed on all disturbed areas. The quality of the topsoil that is placed will be at least equal to the topsoil of the immediately surrounding area.
- D. After the placement of the topsoil, the site will be tilled and broadcast seeded with a 150 mixture as specified in the reclamation plan.

A visual representation of the reclamation plan is included on plan sheet 3 of 3, labeled *Reclamation Plan*.

This estimated cost associated with this reclamation activity is \$40,000.

SUMMARY

The materials that are available in this property are of very high quality and would provide excellent building material for today's roads and developments. It would also provide a more competitive market for gravel and asphalt in this area, resulting in taxpayer savings. If a conditional use permit is granted, every effort will be made to cooperate with the conditions that are placed upon this operation and to reclaim the property as well, making it an attractive site for generations to come. Based on all of this, we respectfully request that a conditional use permit be granted for the mining and processing of gravel and granular materials that are available on this property.

- RECLAMATION PLAN**
- The natural habitat of the area that is disturbed will be restored, in as much as it is possible, resulting in returning this gravel pit area to pasture land after completion of mining. This will be done by being careful not to disturb any more land that is necessary for the removal of the aggregates and also by beginning the reclamation process as soon as possible after the material is removed. The reclamation plan includes the following aspects:
- The site shall be graded so that it is in substantial conformance with the proposed contours shown, in as much as it is possible. This will result in a drainage pattern to the northwest and Northeast of the site.
 - All slopes greater than 2:1 will be flattened, resulting in a gently rolling topography and substantial conformity to the land immediately surrounding the site, which will minimize erosion due to rainfall.
 - A minimum of 4' topsoil will be placed on all disturbed areas above the water line. The quality of the topsoil that is placed will be at least equal to the topsoil of the immediately surrounding area.
 - After the placement of topsoil, the site will be tilled and broadcast seeded with a 150 mixture (shown below) as per the DNR Handbook for Reclaiming Gravel Pits.

Conditions for Permit No. 4-22 (Duininck Inc./Ryan Robinson)

1. The permit holder shall comply with all applicable laws, rules, and regulations, including but not limited to Redwood County Zoning Ordinance, as hereafter amended from time to time. The permit holder shall abide by all MSHA requirements. The permit holder shall comply with all federal, state and local laws.
2. The permit holder shall allow the Redwood County Environmental Office to inspect the site for all purposes permitted by law whenever deemed necessary by the Redwood County Environmental Office.
3. The permit holder shall have proper warning signs posted along CSAH 6 during times that material is being hauled into or out of the site. The warning signs shall conform to the requirements and guidelines as provided in the Minnesota Manual on Uniform Traffic Control Devices.
4. All waste and refuse generated by or from the interim use must be disposed of in the manner provided by the applicable local, state, and federal statutes, rules, and regulations. A copy of all disposal records and receipts must be kept on file for no less than five (5) years and provided to the Redwood County Environmental Office upon request.
5. The permit holder shall contact all relevant local, state, and federal authorities/entities and inquire as to whether a permit and/or license is required. If a permit and/or license is required, the permit holder shall apply for and obtain any and all required permits and/or licenses. A copy of all such permits and/or licenses shall be provided to the Redwood County Environmental Office upon request.
6. The permit holder shall not allow the interim use to be injurious to the use and enjoyment of other property in the immediate vicinity for the purposes already permitted. The permit holder shall not allow the interim use to impede the normal and orderly development and improvement of surrounding vacant property for uses predominant to the area. Adequate measures shall be taken to prevent or control offensive odor, fumes, dust, noise and vibration, so that none of the foregoing will constitute a nuisance now or in the future.
7. Hours of operation shall be 6 am to 8 pm.
8. The permit holder shall not exceed the boundary limits described and set forth in the *Application for Extraction Interim Use Permit*. The permit holder shall keep any pit, excavation, or impounded waters within the limits for which the particular permit is granted. The completion date of this *Extraction Interim Use Permit* will be April 1, 2032.
9. If any other equipment (i.e. hotmix plant, bag house, etc.) other than excavation and aggregate processing equipment used at the site shall require a new interim use permit. The excavation site shall not be used for a demolition site unless the permit holder obtains the proper permits from the State of Minnesota and Redwood County.
10. Adequate access roads, drainage, and other necessary facilities shall be provided at all times and shall continue to be provided by the permit holder now and in the future.

11. The permit holder shall at all times properly guard and keep any pit or excavation in such condition so as not be dangerous from caving or sliding banks. The permit holder shall properly drain, fill, or level any pit or excavation after created so as to make the same safe and healthful which shall be determined by the Board of Commissioners. The permit holder shall grade the site after the excavation and extraction has been completed so as to render it usable. The site shall be reclaimed according to the reclamation plan included in the *Extraction Interim Use Permit*, reserved topsoil spread on the site and thereafter seeded with approved seed where required to avoid erosion and an unsightly mar on the landscape. The site shall be clean and free of all debris, including stockpiles, when the *Extraction Interim Use Permit* reaches its completion date.
12. All slopes will be flattened and/or graded to a maximum slope of 3:1 (run to rise).
13. The permit holder shall post a bond, cash deposit, irrevocable letter of credit, or other security in the amount of \$62,500.00. Further, the bond, cash deposit, irrevocable letter of credit, or other security shall remain in full force and effect for a minimum of one year beyond the completion date of *Extraction Interim Use Permit*.
14. The permit holder shall maintain bodily injury, property damage, and public liability insurance in the amount of at least \$1,500,000 per occurrence during the life of the extraction operation and shall provide proof of the same to the Redwood County Environmental Office.
15. Upon the request of Delhi Township, the permit holder shall enter into and abide by a written agreement with the Delhi Township Board of Supervisors regarding repair and maintenance of 395th Street.
16. The Redwood County Planning Commission shall review the interim use permit and shall be authorized to take any and all necessary action(s), including but not limited to revoking the interim use permit and/or requiring the permit holder to reapply for a interim use permit, if: 1) The Redwood County Environmental Office acquires information previously unavailable that indicates the terms and conditions of the permit do not accurately represent the actual circumstances of the permitted facility or the interim use; 2) It is discovered subsequent to the issuance of the permit the permit holder failed to disclose all facts relevant to the issuance of the permit or submitted false or misleading information to the Redwood County Environmental Office, the Redwood County Planning Commission, or the Redwood County Board of Commissioners; 3) The Redwood County Environmental Office determines the permitted facility or interim use endangers human health or the environment; and/or (4) The permit holder violates any of the herein described conditions, the Redwood County Ordinances, State statutes, or Federal laws.

REDWOOD COUNTY PLANNING COMMISSION

Duinick Inc. – Extraction
Interim Use Permit Application #4-22
May 3, 2022

FINDINGS OF FACT

ORDINANCE CRITERIA – The Planning Commission may recommend the granting of a Conditional Use Permit in any district provided the proposed use is listed as a conditional use for the district and upon a showing that the standards and criteria stated in this Ordinance will be satisfied and that the use is in harmony with the general purposes and intent of this Ordinance and the Comprehensive Plan.

In determining whether the proposed use is in harmony with the general purposes and intent of the Ordinance and the Comprehensive Plan, the Planning Commission shall consider and make findings on the following questions:

1) What potential health safety and welfare impacts were raised at the hearing and why will they, or why won't they, impact the neighboring residents?

2) What potential impacts on area property uses were raised at the hearing and why will they, or why won't they, impact the property uses in the area?

3) What potential impacts on property values or future development were raised at the hearing, and why will they, or why won't they, impact the neighboring properties?

4) What infrastructure is needed to support the proposed use and how will it be provided?

5) How do the goals, purpose and policies of the Zoning Ordinance and Comprehensive Plan apply to the proposed project?

RE: Notice of Public Hearing on Application for Extraction Interim Use Permit

Please find enclosed a *Notice of Public Hearing* regarding an *Application for Extraction Interim Use Permit* submitted by Jason Ver Steeg of Duinick, Inc., on behalf of landowner Ryan Robinson, pursuant to Redwood County Code of Ordinances, Title XV, Sections 153.420 and 153.283. Duinick Inc. is proposing to extract, process, and stockpile gravel and aggregate materials from/on the following described real property, situated in the County of Redwood, State of Minnesota, to wit:

The Northwest Quarter (NW1/4) of Section 5, Township 113 North, Range 36 West, Delhi Township.

A public hearing thereon will be held before the Redwood County Planning Commission at a meeting scheduled at 2:00 o'clock p.m. on Tuesday, the 3rd day of May, 2022, at the Learning Center Room in the Redwood County Government Center located at 403 South Mill Street, Redwood Falls, MN 56283.

Pursuant to Redwood County Zoning Ordinance, all property owners of record within five hundred (500) feet of the incorporated areas and/or one-quarter (1/4) of a mile of the affected property or the ten (10) properties nearest to the affected property, whichever would provide notice to the greatest number of landowners in the unincorporated areas, the township in which the affected property is located, and all municipalities within two (2) miles of the property are required to be notified in writing of the time and place of the public hearing.

If you have any comments or questions regarding this matter, please contact the Redwood County Environmental Office by telephone at (507) 637-4023, via email at Environmental@co.redwood.mn.us, or by mail at *Redwood County Environmental Office, P.O. Box 130, Redwood Falls, MN 56283*, and/or attend the public hearing at the time and date set forth in the *Notice of Public Hearing*.
