

STALKING & INTIMATE PARTNER VIOLENCE: FACT SHEET

There is a real and frighteningly significant connection between stalking and intimate partner violence. Stalking often co-occurs with intimate partner violence and can be an indicator of other forms of violence. Stalking can be a way to exert power and control during and/or after an abusive relationship.

DID YOU KNOW?

- 40% of stalking victims are stalked by current or former intimate partners.^A
- 57% of intimate partner stalking victims are stalked during the relationship.^B
- 74% of those stalked by a former intimate partner report violence and/or coercive control during the relationship.^C
- 81% of women stalked by a current or former husband or cohabitating partner were also physically assaulted by that partner.^D
- 31% of women stalked by an intimate partner were also sexually assaulted.^E
- 41% of victims stalked by a current intimate partner and 35% stalked by a former intimate partner experience threats of harm, compared to 24% stalked by a non-intimate partner.^F
- The average length of partner stalking is 2.2 years (longer than the average of just over 1 year for non-intimate partner cases).^G

STALKING & PARTNER HOMICIDE

- Stalking increases the risk of intimate partner homicide by three times.^H
- The most common use of the criminal justice system prior to attempted or completed intimate partner homicide was reporting intimate partner stalking.^I
- Among female victims of attempted and completed intimate partner homicide by male partners, in the 12 months prior to the attack:^J
 - 85% of attempted and 76% of completed homicide victims were stalked.
 - 91% of attempted and 89% of completed homicide victims who had been physically abused during the relationship had also been stalked.
 - 46% of attempted and 54% of completed homicide victims reported stalking before the attack, most commonly to police.

INTIMATE PARTNER STALKING OFFENDERS

- Abusive partners who stalk are more likely (than abusive partners who do not stalk) to verbally degrade, threaten, use a weapon to attack, sexually assault, and/or physically injure their victims.^K
- Intimate partner stalkers are more likely (than stalkers who are not intimate partners) to:
 - Use the widest range of stalking tactics.^L
 - Contact and approach victims more frequently.^M
 - Assault their victims.^N
 - Be insulting and interfere in the victim's life.^O
 - Escalate the frequency and intensity of pursuit more often.^P
 - Threaten victims with weapons or actually use weapons on their victims.^Q
 - Be threatening to their victims and reoffend.^R
 - Follow through on threats of violence.^S One study found that among stalking victims threatened, 71% of intimate partner victims were actually assaulted compared to 33% of non-intimate partner victims.^T
 - Assault third parties.^U
 - Reoffend after a court intervention and reoffend more quickly.^V
- The risk of physical violence is heightened when the intimate partner stalker:^W
 - Issues direct threats of violence;
 - Expresses jealousy of the victim's relationships with others during the relationship; and
 - Uses illegal drugs.

STALKING & SEPARATION

- Victims stalked by violent partners report more separation attempts than partner violence victims who were not stalked.^X
- Intimate partner stalking made victims more likely to want to leave the relationship than other factors, including psychological aggression and injury.^Y
- Stalking after a separation may increase the risk of violence.^{ZAABB}
